

Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your lake needs to maintain clean, clear water.

The use of fish safe dye is a common part of an overall pond maintenance program. Dyes may be added directly into the pond/lake (preferably in several locations). Blue lake dye creates a calming "Caribbean" blue tint to pond water.

These concentrated dyes will save you in shipping costs

- Four - 4 ounce water soluble packets (WSP) per pouch
- Simply toss WSP into pond for easy application.
- This is a nontoxic pond dye for use in ponds/lakes.
- Waters can be used for swimming and irrigation once product is dispersed.
- Compatible with most aquatic herbicides and algaecides
- WSPs are double sealed water soluble film.
- Master cases of 20 pouches - inner cases of 5 pouches
- Also available in Black dye (creates a dark reflective tint) and Serenity dye (creates a deep blue tint)

1 wsp per 1/3 acre, 3'-4' deep

Directions for Use

- Three WSPs (water soluble packet) will treat one acre, 3'-4' deep with a bonus packet for a deeper color or touch-up as needed.
- To prevent staining — handle with care prior to dilution and dispersing in water
- Use of gloves is recommended while applying product
- Dye will not stain rocks, plants, pets, wildlife or people once diluted and dispersed in water
- Compatible with most other water treatments

KEEP OUT OF REACH OF CHILDREN

Safe for fish & aquatic life

Ideal For

- Recreation ponds
- Farm ponds
- Golf course ponds
- Ornamental ponds
- Retention ponds
- Irrigation ponds

When to Use

- To create an appealing appearance in lake water
- Spring, summer and fall, as needed
- Ideal for large ponds and lakes
