

Water Feature Dyes

PD16 • PD16B • PD16C

Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your pond needs to maintain clean, clear water.

This colorant is designed for use in water gardens and koi ponds. It will not stain birds, fish, plants, pets, wildlife or people once diluted and when applied at the recommended rate. Handle with care prior to dilution to prevent staining.

- Provides a natural tint to pond water
- Helps filter out UV rays from the sun
- Concentrated formula - use one ounce per 1000 gallons of water!
- Does not stain or harm fish, plants or other wildlife once dispersed
- Blue dye gives water a "Caribbean Blue" look
- Black dye gives a more "reflective" look
- Serenity dye is a blackish-blue combination pond dye
- Maintains a healthy, balanced ecosystem and reduces pond maintenance
- Safe for use around fish, plants and pets

1 fl. oz. per
1,000 gallons

Directions for Use

- Apply 1 fl. oz. per 1,000 gallons of pond water, every month or as needed (use more or less for desired color)
- To prevent staining — handle with care prior to dilution and dispersing in water
- Use of gloves is recommended while applying product
- Dye will not stain rocks, plants, pets, wildlife or people once diluted and dispersed in water
- Compatible with most other water treatments
- Chlorinated water will cause color to fade, requiring more frequent application

KEEP OUT OF REACH OF CHILDREN

Safe for fish & aquatic life

When to Use

- To create an appealing appearance in pond water
- Spring, summer and fall, as needed
- Ideal for water gardens, ponds and reflecting pools
