

## Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your pond needs to maintain clean, clear water.

Pond-Vive L is a proprietary blend of enzyme producing beneficial bacteria formulated to help improve water quality and reduce sludge in ponds, lakes and other water bodies. By consuming and breaking down waste in the pond, Pond-Vive L bacteria reduces the nutrient load of a pond to help keep it in balance and improve overall water quality. When used in conjunction with aeration, Pond-Vive L works with nature to provide clean, clear water and reduce reliance on pond chemicals.

- A convenient alternative to Pond-Vive powder for ponds under one acre
- Reduce sludge buildup and eliminate pond odors
- Improve water clarity and reduce oxygen demand
- Eliminate excess nutrients
- Reduces ammonia, nitrite, nitrate and phosphate
- Cold weather bacteria strains, for results in temperatures as low as 38°F

## Directions for Use

For best results begin treatment when water temperatures are above 55°F. Cold water strains will have effectiveness in water temperatures as low as 38°F. Product is ready to use. Pond-Vive L can be sprayed over pond surface or applied at several spots around the pond. If desired, it can be mixed with pond water for applying over broader area.

### **Initial or Spring Applications:**

Apply 1 gallon per acre every week for 4 weeks, then maintenance dose

### **For Maintenance Applications:**

Apply 1 gallon per acre every 2 weeks

### **For Problem Ponds:**

Apply 1 gallon per acre every week until desired results are achieved

Avoid using copper based algaecides for 48 hours before applying.

### **KEEP OUT OF REACH OF CHILDREN**

**Not for human or animal consumption**

**Safe for fish & aquatic life**

## Sizes

Part #	Description	Size	Treats Up To
PB128	Pond-Vive L	128 fl. oz.	1 surface acre
PB-55G	Pond-Vive L	55 gallon drum	55 surface acres
PB250T	Pond-Vive L	250 gallon tote	250 surface acres

## Ideal For

- Aquaculture
- Farm ponds
- Golf course ponds
- Recreation ponds
- Ornamental ponds
- Retention ponds
- Irrigation ponds

## When to Use

- Every two weeks spring, summer and fall

## Parameters for Best Results

- Temperature:  
Optimal 75°F, Range: 38°F - 100°F
- Dissolved Oxygen (DO):  
>2 ppm, Minimum 1 ppm
- pH: Optimal 7, Range: 5.5 to 9.5
