Description

- This unique formulation is produced using a "no mess" water soluble packet, which simply dissolve in water for easy application
- Reduces toxic ammonia and nitrite
- Reduces problem causing nitrate and phosphate
- Reduces murky water caused by organic wastes
- Reduces organic bottom sludge (muck)
- Reduces odors
- Works in water temperatures down to 45° F

Directions for Use:

- Apply one 1 oz. packet per 1000 gallons of pond water every week.
- For heavy sludge or cold-water applications below 45° F apply two 1 oz. packets per 1000 gallons of pond water per week until water clears.

Initial Dose:

1 packet per 1000 gallons

Maintenance Dose:

1 packet per 1000 gallons
